Ten-year review of progress achieved in the implementation of the outcome of the United Nations Conference on Environment and Development

The General Assembly,

Recalling the United Nations Conference on Environment and Development, held in Rio de Janeiro from 3 to 14 June 1992, and the nineteenth special session of the General Assembly for the purpose of an overall review and appraisal of the implementation of Agenda 21, held in New York from 23 to 28 June 1997,

Recalling also that Agenda 21 and the Rio Declaration on Environment and Development should constitute the framework within which the other outcomes of the Conference are reviewed, and from within which new challenges and opportunities that have emerged since the Conference are addressed,

Recalling further its resolutions 53/188 and 54/218 on the implementation of and follow-up to the outcome of the Conference and the special session, as well as its resolution 55/2,

Recalling decision 8/1 of the Commission on Sustainable Development on preparations for the 10-year review of progress achieved in the implementation of the outcome of the Conference,

Recalling also that chapter 33 of Agenda 21 identified the Global Environment Facility as one source of financing for the implementation of Agenda 21,

Recalling further the importance of chapter 34 of Agenda 21 for developing countries,

Taking note with appreciation of the report of the Secretary-General on ensuring effective preparation for the 10-year review of progress achieved in the implementation of the outcome of the Conference and the nineteenth special session,

Taking note with appreciation also of the Malmö Ministerial Declaration adopted at the sixth special session of the Governing Council of the United Nations Environment Programme,

Deeply concerned that, despite the many successful and continuing efforts of the international community since the Stockholm Conference and the fact that some progress has been achieved, the environment and the natural resource base that support life on earth continue to deteriorate at an alarming rate,

Reconfirming the political importance of the forthcoming 10-year review of progress achieved since the United Nations Conference on Environment and Development and underscoring that the review should focus on the implementation of Agenda 21 and other outcomes of the Conference, as well as the Programme for the Further Implementation of Agenda 21 adopted by the General Assembly at its nineteenth special session in 1997,

Bearing in mind that its substantive activities should take into account, as appropriate, the outcomes relevant to sustainable development of other United Nations conferences and summits and their follow-up activities,

Bearing further in mind that national reports that have been prepared by Governments since 1992 on national implementation of Agenda 21, and to which major
groups have contributed, could provide a fair basis for guiding national preparatory processes,

Reconfirming that Agenda 21 and the Rio Declaration on Environment and Development should not be renegotiated and that the review should identify measures for the further implementation of Agenda 21 and the other outcomes of the United Nations Conference on Environment and Development, including sources of funding,

1. **Decides** to organize the 10-year review of progress achieved in the implementation of the outcome of the United Nations Conference on Environment and Development in 2002 at the summit level to reinvigorate the global commitment to sustainable development, and accepts with gratitude the generous offer of South Africa to host the summit;

2. **Also decides** to call the summit the World Summit on Sustainable Development;

3. **Further decides** that the review should focus on the identification of accomplishments and areas where further efforts are needed to implement Agenda 21 and other outcomes of the United Nations Conference on Environment and Development and should focus on action-oriented decisions in areas where further efforts are needed to implement Agenda 21, address, within the framework of Agenda 21, new challenges and opportunities, and result in renewed political commitment and support for sustainable development, consistent, inter alia, with the principle of common but differentiated responsibilities;
